NEXT LIGHTING – GUTES LICHT IN AUSSERGEWÖHNLICHER FORM

In unserer kleinen Manufaktur in Köln stellen wir mit großer Leidenschaft außergewöhnliche Leuchten her.
Ob aus mundgeblasenem Glas, ABS oder PE sie haben alle eines gemeinsam: Ihr Design ist immer einzigartig.

Die Materialien und Komponenten, aus denen wir unsere Leuchten fertigen, suchen wir mit allergrößter Sorgfalt aus.
Nachhaltigkeit ist uns ebenso ein Anliegen wie ausgefeilte Technik – unsere Leuchten sind mit der neuesten Technologie ausgestattet und natürlich in LED erhältlich.

Mit ALIEN, BLADE, BLUBB, COSMO & Co. haben wir in den letzten Jahren eine kleine, aber feine und preisgekrönte Leuchtenkollektion auf die Beine gestellt, auf die wir sehr stolz sind.

next-Leuchten sind frisch und unkompliziert und in ihren Einsatzmöglichkeiten nahezu grenzenlos.
Und mit dem neuen Montagesystem PLUX für Pendelleuchten immer wieder neu arrangierbar.

ALIEN, BLUBB, CAO MAO und LIQUID_LIGHT gibt es in mehreren Größen.
ALIEN, COSMO und LIQUID_LIGHT sind sowohl für Drinnen als auch für Draußen geeignet.

Neu bei next lighting ist die Leuchte BLUBB. Aus mundgeblasenem Glas gefertigt, besticht sie mit einer einfachen, aber ausdrucksstarken Formensprache. Wie alle unsere Leuchten, lässt sich BLUBB wunderbar in zahlreiche Arbeits- und Wohnumgebungen integrieren – als Einzelstück oder in Gruppen.

Viel Freude und Inspiration bei der Suche nach Ihrer perfekten next-Leuchte!

Ihr Thomas Schulte

NEXT LIGHTING – BETTER LIGHTING IN AN EXCEPTIONAL FORM

In our small, Cologne-based workshop we craft exceptional luminaires for you with great passion. Whether they are made from hand-blown glass, ABS or PE – they all have one thing in common: their design is absolutely unique.

The materials and components from which we make our luminaires are selected with the greatest care. Sustainability is as important to us as sophisticated technology – all our luminaires come equipped with the latest technology and are of course available with LEDs.

Over the recent years, we have managed to create a small, excellently crafted and award-winning luminaire collection with models such as ALIEN, BLADE, BLUBB, COSMO and co, which we are very proud of.

next luminaires are fresh, uncomplicated and almost limitless in application. Thanks to our patented PLUX mounting system, the pendant lamps from next are easy to install and can be rearranged over and over again without effort.

ALIEN, BLUBB, CAO MAO and LIQUID_LIGHT are available in a variety of sizes.
ALIEN, COSMO and LIQUID_LIGHT can also be used as interior or exterior lighting.

New from next lighting is our luminaire BLUBB. Made from hand-blown glass, it manages to captivate the eye with a simple yet expressive design language. Like all our luminaires, BLUBB can be ideally integrated in a wide range of working or living contexts – either as a single lamp or in groups.

We wish you much joy and inspiration while browsing for the next luminaire which is perfect for you!

Sincerely, Thomas Schulte
